Learn Equivalent Fractions With A Fun Activity!

A fun way to teach equivalent fractions is with this fun Equivalent Fraction activity!

Cut out the manipulatives:

Then on the activity page play with the manipulatives. Use them to make equivalent fractions.

Here are some example to show you how this works:

Here you have: $\frac{1}{2}$

Tell your student, "I get 1 candy and you get 2 candies."

Now if I get 1 more candy, how many will you get? You put down the green one on the top and have the student put the orange bar on the bottom. It is OK if the student puts two green. So now the fraction that you have is $\frac{2}{4}$ and

this is equivalent to $\frac{1}{2}$

You can do this with different and bigger numbers and it all works the same! Have fun!

Cut out the blocks.

Equivalent Fraction Board

I get!

You get!

Write out the equivalent fractions:

$$\frac{1}{2} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{2}{2} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{1}{3} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{2}{3} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{3}{3} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{1}{4} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{2}{4} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{3}{4} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$

$$\frac{4}{4} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad} = \frac{\quad}{\quad}$$
